

# EOSC Future Public Home

## Welcome to the EOSC Future wiki!

This is the public area of the wiki. On this page you can see information about the EOSC Future project that is openly available to everyone.

Members of the EOSC Future project consortia can additionally obtain access to the [EOSC Future Private Wiki Space](#). If you believe you are eligible to access to this area, please follow the process described **at the bottom of this page**.

## Content you will find in this wiki

### Training and Skills

The Knowledge Hub covers the EOSC Training Catalogue and Learning Platform

### EOSC Future User Group

The home page of the EOSC Future User Group supporting the co-design of EOSC

### Architecture and Interoperability

These pages cover the architecture and interoperability work within the EOSC Future project

### EOSC Core Infrastructure Proxy - Policy for connecting services

The EOSC Core Infrastructure Proxy policy covers the connection of the EOSC Core and EOSC Support Services to the EOSC Federated AAI.

### EOSC Future Glossary

The glossary of the EOSC Future project containing definitions of terms and acronyms

## Obtaining access to the EOSC Future Private Space

If you are a member of the EOSC Future project consortia and require access to the [EOSC Future Private Wiki Space](#), you need to register **individually** via **Jira**. To do this, please do the following:

- Login to **Jira** <https://jira.eoscfuture.eu> using the **EOSC Portal AAI** using your institutional Identity Provider (this *cannot* be done on behalf of another user);
- Using the **Create** button at the top of the **Jira** page open an issue in the **Support** project (short name: HELP) to ask for access to the private areas;
- Please include your institution, your institutional email and the name of the work package you are involved in.

The service administrators will aim to grant you access within 3 working days.
